

WHAT MERCEDES OWNERS SAY

- **I've run the KMAC bushings** on the front end for over 66 000 miles (>100,00 kilometers). KMAC beats the OEM hands down. I'm glad I invested in them. Over 66.000 miles and I still have not had to adjust the front Camber. On a Mercedes, I now regard that as great!
- **C63S AMG W205** - "You need to fit KMAC Camber Kits to preserve Tires. 3 sets in 18 months. Now perfect wear across front and rear after another 18 months, seriously worth fitting.
- "Purchased a front kit from KMAC for my C63 S so that I could dial in some front Camber for track events. Great system. Well engineered and I am happy with it. It was also priced fair. I highly recommend them."
- **CLS 55 AMG W219** - "Used to be 6-10k down to the cords. Bought KMAC bushings and started doing my own alignments, now it's 30+. That's a whole year for me. I went through 6 grand worth of tires in the first 2 years of ownership. Had to take control of the situation."
- **GLA 45 AMG X156** - Just want to thank you guys. Stunning - track days difference is night and day.
- **C63 AMG W204** - "Talk all you want about toe in/out.... negative Camber would factor in. 2nd premature replacement of tires.... 'C' is a daily driver, commute 50+ miles one way. Replacing tires after 7-8 months getting annoying. Now able to get full degree positive camber. Quality.... KMACS seemed much better material to the OEM items removed.."
- **CLK 55 AMG W209** - "Factory set up caused the outside edges of the tires to wear excessively..."
"Ride quality is significantly improved, steering input is instant and responsiveness is fantastic."
- "I installed the KMAC front kit yesterday. I was impressed with the quality, and the parts to help remove the old bushings and install the new ones were a life saver. The kit has enough adjustment to completely fix the front camber on my lowered CLK55. I have the rear kit ready to go for next weekend."
- **E63 AMG W211** - "The E63 Mercedes that we installed the KMAC bushings on. . . And lowered it one inch. It is unbelievable how well it handles now. They should build cars that way from the factory!"
- **E320 W211** - "I'd endorse KMAC any time; so much control / adjustment available. I had everything professionally installed of course. Nothing out there matches KMAC bushings; it was money worth spent."

1968 - 2020

All Sedans, Coupes, Wagons, SUV's, AMG/Black, Sprinter, Vito New Car Industries Best Kept Secret

Only Toe "Directional" Adjustment OEM!

(Its all to do with cost savings / ever increasing speed of auto assembly lines)

NO CAMBER OR CASTER TO ADJUST TIRE CONTACT ANGLES

With Excess "Edge Load" Leading to Higher Impact, Ruptured side walls, Rim damage !

AUDI to VOLVO
