FINALLY FRONT & REAR ONGOING

IMPROVE TRACTION & EDGE TIRE WEAR

Camber, Caster (and extraToe) Kits

AUDI TO VOLVO - Including Mercedes 'AMG', BMW 'M', Porsche '991'

Genuine KMAC....

FRONT Camber & Caster Bush Adjuster Kit

DOUBLING EXISTING ADJUSTMENT RANGE

(tauter response also resolving costly, premature bush failure) Replacing the 4 front highest wearing

**W124/C, R129, W201
Incl. AMG**

#501716J

Also manufactured REAR Camber (and extra toe) adjuster #502026H

UNIQUE KMAC PATENTED DESIGN

Precisely Adjustable - Single Wrench /
under load, direct on alignment rack !

FITTING **PRECISE ADJUSTMENT NO SPECIAL TOOLS REQUIRED**

- A.** Remove the '2' lower control arms from front of vehicle.
(Refer workshop manual and observe all Safety procedures)

- B.** Clamp / secure each control arm in vice - as in picture

- C.** As in picture now use a chisel (around outer edge of each bush steel flange lip) and tap out each 'half' bush.

- D.** Clean holes and insert the new elastomer Bushes. Use the silicone grease supplied to grease the Inner (only) hole in bushes. Then insert the hardened steel inner bushes.

- E.** Re install arms in vehicle. To aid reconnection of the new bolts check and adjust the 'D' hole in each bush so is in 12 o'clock position (insert a new KMAC 'D' bolt and rotate bolt head).

- F.** Raise arm back up till holes line up so the new KMAC 'D' shape bolt can be inserted (New Cam washers under bolt head first) - Bolt flat facing upwards to match 12 o'clock position of the bush 'D' hole.

- G.** Then another Cam washer on thread end, plus lock tab washer and new KMAC nut.

WHEEL ALIGNMENT

SIMPLY ROTATE BOLT HEADS - UNIQUE KMAC PATENTED SYSTEM
(allowing accurate adjustment "under load" direct on alignment rack)
Make sure nuts are loose and rotate the bolt heads of both bush mounts for Camber and Caster. Once required setting, hold head of bolts in this position and fully tighten the nuts to **122Nm (90 ft/lbs)**.

Then fold one of the 3 lock tabs that lines up with the side of a nut

Check / readjust existing Toe settings.

ESSENTIAL - RECHECK / MAKE SURE NUTS ARE FULLY TIGHT
(Loose Nuts Cause Noise)

“TOTAL SYSTEM”
OTHER POPULAR KMAC SUSPENSION
UPGRADES ALSO MANUFACTURED

REAR - Camber (and extra Toe) adjustable Bushings lower arm inner. Also precise single wrench, easily accessible (accurately under load direct on alignment rack). Retains top of tire to outer fender clearance when adjusting to reduce costly, premature inner edge tire wear / gain traction. **#502026K**

REAR - Up-rated bushings for the ‘6’ Multi Link Arms (12). Significant improvement to rear end stability - less twitch / flex / loss of traction. Especially when applying power to lane change / overtake **#501528K**
AMG & Black series **#502528K**

W124/C, R129, W201 **#501716J**
Incl. AMG

(Kits to suit Front & Rear all Mercedes 1968 - 2021 incl. Sedans, Coupes, Wagons, SUV’s, AMG, Black Series, Commercials)

FRONT CAMBER (& CASTER) DOUBLING EXISTING ADJUSTMENT RANGE
(and accurate-underload direct on alignment rack)

- ✓ **CAMBER, CASTER - Positive or Negative**
- ✓ **ADJUSTMENT - Precise “Single Wrench”**
- ✓ **BUSHINGS - Elastomer, not rubber for improved Brake & Steering response with twice the load bearing area**
(and at same time replacing the highest wearing)
- ✓ **INCLUDES - Extraction tool (fit on vehicle)**
- ✓ **NO MODIFICATIONS - To install**

Always 1st With The Latest Design Breakthroughs ...

- 1. WISHBONE:** Precise Ball Joint Adjustment System.
 - 2. STRUT(top):** Biggest/Quickest Adjustment System.
 - 3. BUSHINGS:** Single Wrench - Precise On Car Adjustment.
- Including unique KMAC “non-slip” lock system!**
